Short Topic Presentation (STP)

The Short Topic Presentation (STP) format is designed to give academic and industrial scientists in the field the opportunity to present and discuss their research in a smaller, more interactive setting and is open to all NERDG participants. The topics for presentations are open to *any* area of pharmaceutical research, development, and technology. The live presentation time is 15-20 min followed by 5-10 minutes of questions. The lead author (first author) is defined as the individual who has performed the majority of the research and is expected to be the one presenting the material. The lead author should present and answer questions during the live session. However, if they cannot be present the day of the conference, a substitute presenter should be designated. The lead author should inform **Heather Frericks Schmidt** as soon as possible at **aapsne@gmail.com**.

Due to limitations on the number presentation slots that the NERDG conference can accommodate, not all STP applications may be chosen for presentation. In such cases, the STP submission may be considered for a Poster Presentation if both the submitter and committee mutually agree.
